RAKTIM C. BHOWMICK

Senior Technical Analyst

Results-driven Frontend and Fullstack Engineer passionate about designing scalable, high-performance web applications through innovation, automation, and modern JavaScript ecosystems. Targeting to contribute as a Senior Frontend / Fullstack Engineer, driving product excellence, UI performance optimization, and emerging AI integrations to deliver impactful digital solutions.

raktim.info@gmail.com +91 8240565314 http://www.linkedin.com/in/raktim24 http://raktim.info/

CORE COMPETENCIES

- Frontend Architecture & Development
- Fullstack Engineering
- UI/UX Design & Optimization
- Enterprise Dashboard Development
- Code Quality & Testing Automation
- Performance Enhancement
- Kaizen & Process Innovation
- AI-Driven Development & Copilot Utilization
- Cross-Functional Collaboration
- Mentorship & Technical Training
- Requirement & Impact Analysis

CAREER TIMELINE

Jul'21 – Present

Seneca Global

Sr. Technical Analyst
↑
Technical Analyst

Jul'17 – Jul'21

Oracle

Software Engineer (Full Stack)
↑
Test Automation Engineer
↑
Solution Designer Test Analyst
↑
Test Analyst

CERTIFICATIONS

- Namaste Node.js from namastedev.com. by Akshay Saini, Pursuing
- Namaste JavaScript from namastedev.com. by Akshay Saini, 2025
- React + Redux, JavaScript, Java — Sololearn
- React.js Essential Training, React Hooks — LinkedIn Learning
- CutShort Certified React.js Basic Developer

TECHNICAL SKILLS

- **Frontend Technologies:** React.js, Redux, Recoil, TypeScript, JavaScript (ES6+), Inertia.js, Mantine UI, Styled Components, Tailwind CSS, Flexbox, Responsive UI/UX Design, React Native, React Spring
- **Data Visualization & UI Components:** D3.js, D3-Annotations, Nivo Charts, Recharts, AG Grid
- **Backend & APIs:** Node.js, Express.js, Apollo GraphQL, MongoDB, SQL
- **Testing & Quality:** React Testing Library, Jest, Enzyme, Selenium WebDriver, Unit Testing, Exploratory Testing, Secure Software Development Lifecycle (SSDL), SOLID Principles
- **Collaboration & Tools:** Git, GitHub, GitHub Copilot, ChatGPT, DeepSeek, Perplexity, Jira, Figma, Agile/Scrum, Code Reviews, Knowledge Transfer (KT) Sessions

PROFILE SUMMARY

- Software Engineer with **over 8 years of experience** across Frontend Development, Fullstack Engineering, and Test Automation within product-based and enterprise environments.
- Currently working as **Senior Technical Analyst (Frontend Research Engineer) at SenecaGlobal**, leading React.js-based enterprise dashboard design and fullstack integration projects for global clients.
- Proven expertise in building complex UI/UX workflow, reusable component architectures, and performance-driven design frameworks using **React.js, TypeScript, Redux, Inertia.js,** and **GraphQL (Apollo).**
- Displayed success in cross-functional collaboration, requirement analysis, and Kaizen-driven process innovation, resulting in measurable efficiency improvements and enhanced product quality.
- Proficient at mentoring developers, driving coding best practices (**SOLID, SSDL**), and leveraging AI tools (**Copilot, ChatGPT, DeepSeek**) to enhance development velocity and maintain cutting-edge delivery standards.
- Recognized as **Winner at the 18th CII National Competitiveness & Cluster Summit 2025** for presenting "**Unified Architecture and Query Optimization for Scalable, High-Performance PFRI Dashboards with Efficient Data Load**".
- Recognized with multiple awards for technical excellence, innovation, & organizational contribution, including "**Pursuit of Excellence**" and multiple "**Bravo Awards**.".

WORK EXPERIENCE

Seneca Global — Jul 2021 – Present

Technical Analyst (Jul 2021- Aug 2025) → Senior Technical Analyst (Sep 2025 - Present)

Projects: Pathfactory Dev, Analytics Dev

- **Frontend Architecture:** Leading design and development of enterprise dashboards (UCL, Goals, Content Play, Campaigns, Buying Signals, PFRI) using React.js, TypeScript, and GraphQL (Apollo).
- **UI/UX Optimization:** Implementing high-performance UI elements — reusable components, dynamic filters, pagination, and caching — improving load performance.
- **Fullstack Development:** Building and maintaining Node.js services, API integrations, and back-end dependency analysis aligned with repo-level compliance.
- **Code Quality & Testing:** Enforcing SOLID principles and Secure SDLC standards; implementing unit-testing frameworks (RTL, Jest) to ensure comprehensive test coverage and product reliability.
- **Innovation & Kaizen:** Spearheading workflow refactors, dynamic filter optimization, and UI performance enhancements as part of Kaizen initiatives.
- **Mobile Development:** Expanding web capabilities to mobile via React Native, improving accessibility and cross-platform reach.
- **Mentorship & Training:** Conducting training sessions on Requirement & Impact Analysis, Risk Assessment, & Advanced React concepts; mentoring interns & associates.
- **AI Tool Utilization:** Leveraging GitHub Copilot, ChatGPT, and DeepSeek to accelerate code reviews, documentation, and development efficiency.

Tools & Tech Stack: React.js, TypeScript, Inertia.js, Mantine UI, Styled Components, Redux, GraphQL (Apollo), Node.js, Express.js, MongoDB, SQL, React Native, React Testing Library, Jest, GitHub Copilot, ChatGPT, DeepSeek, Figma, Jira

Achievements:

- Delivered PFRI dashboards and New Content Library UX revamp end-to-end with measurable improvements in performance and usability.
- Recognized with "Pursuit of Excellence" and multiple "Bravo Awards" for innovation and high-impact delivery.
- Appreciated directly by Product Owners and CTO for proactive contributions to UI/UX excellence and delivery precision.
- Consistently acknowledged in performance reviews for Kaizen innovation, leadership, and collaborative execution.
- Delivered enterprise-grade dashboards (UCL, Goals, etc.), reducing average load time from 4.5s to 1.8s through optimized component data fetching architecture.
- Spearheaded a full UX revamp of the New Content Library, cutting client-reported support tickets by 40% within one quarter.

Oracle (formerly Cerner Healthcare Solutions) — Jul 2017 – Jul 2021

Software Engineer (Full Stack) — Jan 2020 – Jul 2021

- **Component Development:** Built 50+ functional and class-based UI components using Terra Framework and React.js with complete visual and functional accuracy.
- **Testing & Coverage:** Developed 100+ Jest and Enzyme test cases ensuring 100% unit test coverage for component workflow.
- **UI Modernization:** Implemented UI mockups using React Hooks, improving component scalability and maintainability.
- **Ownership & Delivery:** Managed an independent module from design to deployment, ensuring adherence to performance and UX benchmarks.

Tools & Tech Stack: React.js, Redux, JavaScript (ES6+), CSS3, HTML5, Jest, Enzyme, GraphQL, Node.js, Express, SQL, Jenkins, Docker, Webpack, Babel, Jira, GitHub

Achievements:
- Achieved full feature ownership with 100% delivery compliance and zero defect leakage post-release.
- Received "U ROCK" Award under Peer Recognition Program for outstanding performance and collaboration.

Test Automation Engineer — Jan 2019 – Dec 2019

- **Automation Development:** Created 100+ automation scripts using Ruby on Rails, HTML, and CSS, reducing manual testing time by 60%.
- **Framework Enhancement:** Added 20 POM-based scripts to the Page Repository, cutting regression test time by 40%.
- **Cross-Tool Expertise:** Automated client workflow using Selenium WebDriver with Python and Java, achieving 80% automation coverage.

Tools & Tech Stack: Selenium WebDriver, Ruby, Python, Java, Capybara, Chai, Mocha, Mochawesome Reports, Touchstone, Eggplant, Tortoise SVN, Excel, Chrome Dev Tools

Achievements:
- Awarded "Night on the Town" (NOTT) recognition for automation and development excellence.
- Improved testing efficiency through automation and early defect detection.

Solution Designer Test Analyst — Jan 2018 – Dec 2018

- Authored 200+ test design documents and reviewed 100+ test plans, ensuring 100% requirement coverage.
- Managed end-to-end requirement capture and technical documentation for complex client solutions.

Tools & Tech Stack: Microsoft Office Suite, HP Quality Center, Soarian Quality Measures

Test Analyst — Jul 2017 – Dec 2017

- Executed 500+ test plans and created 1,000+ test cases for critical workflow.
- Identified and reported 200+ defects, improving product quality by 40%.
- Supported Agile and Scrum-based testing cycles for continuous delivery.

Tools & Tech Stack: XML, TouchStone, Eggplant, Jira, Agile/Scrum Framework

EDUCATION

- 2017: MCA (Masters in Computer Applications), Vellore Institute of Technology | 9.15 CGPA
- 2015: B.Sc. (Hons) Computer Science, Asutosh College, Calcutta University | 60.1% (1st Class)

PERSONAL DETAILS

- **Date of Birth:** 28th March 1993
- **Languages:** English, Hindi, Bengali
- **Address:** Kolkata, 700061
